

How does it feel?

What are different textures used for? Try this guessing activity.

You will need

- a scarf
- several objects made of materials with different textures, such as a paper towel, bath towel, baking pan, piece of paper, sandpaper, hairbrush and ball of wool

What to do

1 Tie the scarf around a friend's eyes so she can't see.

2 Hand your friend different objects to touch. Have her describe the texture of each one.

3 Ask your friend to guess what each object might be used for.

What's happening?

Materials with different textures have different uses. A smooth piece of paper is good for writing on. Rough sandpaper helps to polish wood.

**My fur is smooth
and my tongue is
rough.**
